

# Ablefield

## Able Field Dash

Steps to Fix:

1. Identify the current colors:

◦ Foreground (text) color:

#77777a

◦ Background color:

#ffffff

2. Adjust the text color to increase the contrast ratio:

◦ Option 1: Darken the text color to something like

#6a6a6d

, which will provide a contrast ratio of at least 4.5:1.

◦ Option 2: Choose a completely different color that offers sufficient contrast.

Correct HTML Example

Here is an example of how you can adjust the text color to fix the contrast issue:

<div class="margin-right-2" style="color: #6a6a6d;">18 Images</div>

Incorrect HTML Example

Here is an example of the original code that does not meet the color contrast requirements:

<div class="margin-right-2" style="color: #77777a;">18 Images</div>

By making this adjustment, the text will be more readable to users with visual impairments, thus complying with WCAG 1.4.3. Always test the new color combination using a

## Suggestion

To test a website, enter the URL below:  
nasa.gov

☐ Use Sitemap to scan all pages

Please select one or more checks to validate your website for Section 508 and WCAG compliance.

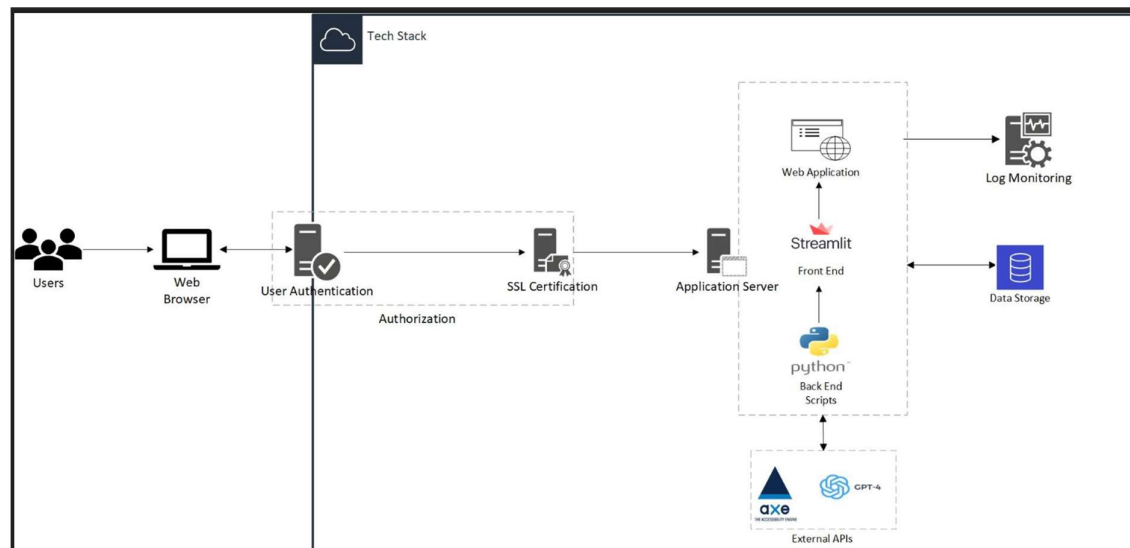

Select Accessibility Checks to Run

Alt Text x Contrast x Keyboard Navig... x Pause/Stop/Hid... x Form Labels and... x
